EDUCATION

Akshaya Institute of Technology

Bachelor of Engineering in Computer Science

Tumakuru, Karnataka

2021 – 2025

EXPERIENCE

Augmented Software Engineer

Archelos Intelsense Technologies

March 2025 – Present

Bengaluru, Karnataka

- Engineered an Employee Management System serving 200+ users with RESTful APIs for employee onboarding, leave management, and role-based access control, boosting operational efficiency by 30%
- Implemented JWT authentication and optimized MySQL database queries, achieving a 25% reduction in API response time while improving overall system performance
- Collaborated closely with product and business teams through regular stakeholder meetings to gather requirements, understand customer journeys, and deliver feature demonstrations
- Actively contributed to Agile development cycles including sprint planning, daily standups, code reviews, and retrospectives while maintaining high code quality standards
- Authored technical specifications and implemented bug fixes following established Software Development Life Cycle best practices

PROJECTS

AI-Powered Student Placement System | *Java, Spring Boot, FastAPI, PostgreSQL, Python*

- Architected a comprehensive placement management platform with AI-driven candidate matching using TF-IDF and Cosine Similarity algorithms, achieving 85% placement prediction accuracy
- Built a microservices architecture utilizing Spring Boot backend (Java 17), FastAPI AI engine (Python), and React 19 frontend with role-based access control via Spring Security and JWT authentication
- Engineered an intelligent resume parser leveraging Natural Language Processing libraries (spaCy, NLTK, scikit-learn) to extract skills, education, and experience from PDF documents, generating personalized skill gap analysis for 500+ candidates
- Designed a responsive dashboard with HTML5, CSS3 (Tailwind CSS), and interactive data visualizations providing real-time placement statistics and application tracking workflows
- Established a unit testing framework and participated in peer code reviews to ensure maintainable, high-quality software adhering to SDLC standards

NexaCart – AI-Powered E-Commerce Platform | *Java, Spring Boot, MySQL, Python*

- Launched an AI-driven e-commerce platform utilizing Natural Language Processing for personalized product recommendations, decreasing customer search time by 35%
- Created scalable REST APIs handling user authentication, shopping cart operations, order processing, and an AI-powered recommendation engine using Spring Boot and MySQL
- Constructed a responsive web interface with HTML5, CSS3, dark mode theming, smooth animations, and advanced filtering capabilities demonstrating strong web development fundamentals
- Applied efficient data structures, algorithms, and design patterns to optimize application performance and ensure a clean, maintainable codebase

TECHNICAL SKILLS

Programming Languages: Java, Python (Beginner), SQL, HTML5, CSS3

Frameworks & Libraries: Spring Boot

Databases: MySQL, PostgreSQL, JDBC, Database Query Optimization

Tools & Platforms: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

Core Competencies: Object-Oriented Programming, RESTful API Development, SDLC, Agile Methodologies

AI & Machine Learning: Natural Language Processing, Generative AI, TF-IDF, Cosine Similarity

AI Tools: Claude (Anthropic), ChatGPT (OpenAI), AI Prompt Engineering
